

Dragon Verion 15.3

KnowBrainer Steps for Ordering, Downloading, and Installing Dragon Professional Software

1. Go to the following link to purchase Dragon Professional. Add it to your cart then purchase it.

NOTE: It's for both 15.61 & v15.30, but you will download and install v15.00 then the v15.30 patch:

<https://shop.knowbrainer.com/store/pc/configurePrd.asp?idproduct=716>

NOTE: Do not select any of the check boxes for add ons, support, or other extras. Just scroll to the bottom of the page for Dragon Professional Individual and "ADD TO CART."

After you purchase the Dragon license from KnowBrainer, follow KnowBrainer's steps for downloading and first installing version 15.0 then installing the 15.3 patch (after version 15.0 is installed).

*****NOTE: Do not install version 15.6.*****

After everything is installed and you have launched Dragon, you can confirm that you have version 15.3 by opening Dragon and from the DragonBar menu items selecting Help / About Dragon. A window will show you the version, which should be 15.30.
